EDUCATION

Qatar University

Bachelor in Computer Science

Doha, Qatar

Aug. 2022 – May 2026

EXPERIENCE

Fullstack Software Engineer intern

Finspire

Oct 2025 – Present

QSTP, Doha

- Built and deployed a full-stack fintech platform on Google Cloud Platform (GCP) using Compute Run for app hosting, Cloud SQL (MySQL) as the managed database, and Cloud Load Balancing for traffic distribution
- Integrated a third-party payment gateway with HMAC signature verification, webhook event handling, and full recurring payment lifecycle management (subscription creation, renewal, cancellation)
- Built OpenAI GPT integration for automated categorization from raw text

Web Developer

974Hub

Oct. 2025 – Jan. 2026

Qatar University, Doha

- Built a website for a research team at Qatar University using Next.js and Supabase as BaaS (Backend-as-a-service).
- Developed a full admin Dashboard with authentication system to manage Website content.

Flutter Full-Stack Developer

Makira Beauty

Jun. 2025 – Oct. 2025

Qatar, Doha

- Built a mobile app for beauty service bookings, connecting clients with artists and service providers using Flutter framework
- Integrated Supabase as the backend for authentication, database operations, and real-time data access
- Implemented dependency injection using GetIt to manage repositories, Cubits, and backend services across the app.
- Used Bloc/Cubit for state management to handle loading, success, error, and data-driven UI states

PROJECTS

Brick2Script | *Next.js, TypeScript, Shadcn, Supabase*

Aug. 2025 – Present

- Lead the development of a full-stack AI-powered coding education platform in Next.js/Supabase featuring in-browser Python execution (Pyodide Web Worker), dual Blockly/Monaco editors, OpenAI-graded submissions, and a gamified progression system.
- Modular feature architecture: Domain-isolated modules (challenges/, workspace/, evaluation/, auth/) with strict cross-domain boundaries via application services
- AI evaluation pipeline: OpenAI model grades submissions against structured test cases and evaluation configs — server-side
- AI hint system: hint reveal system that serves contextual AI-generated hints tied to challenge attempts
- Used Celery and Redis for asynchronous tasks

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Dart, SQL (Postgres), HTML/CSS

Frameworks: Next.js, React, Node.js, Flutter, FastAPI, Blockly

Backend & Databases: Firebase, Supabase, Prisma, GCP

Tools & LLMs: OpenAI API, Gemini API, Git, Code-base AI setup
